REHAU CONNECT+

Digitalisation Perfected. Simple. Efficient. Seamlessly Connected.

REHAU Window Solutions at Fensterbau Frontale 2026.

- **New: REHAU CONNECT+ as the central platform with a single login and modular components for all roles along the value chain.**
- **New: AI-supported GAEB integration accelerates the processing of tenders, reduces errors and relieves project teams.**
- **New: Rack.ID launching to market – digital rack management increases transparency between production, logistics and installation.**
- **Digital Product Passport (DPP) in focus: Ready now for forthcoming regulatory requirements.**
- **REHAU Window.ID ensures regulatory future-readiness and simplified verification across the entire lifecycle.**

At Fensterbau Frontale 2026, REHAU Window Solutions presents a comprehensive range of new Digital Services with clear added value for window professionals. At the heart of the offering is REHAU CONNECT+, the central digital platform for window manufacturers, retailers, architects and planners, delivering a wealth of new benefits from initial enquiry through planning and production to installation and service. The digital innovations simplify, accelerate and create new opportunities. As an All in One Partner with unique innovation expertise, REHAU Window Solutions consistently translates digital solutions into operational relief, high process quality and commercial stability.

Erlangen, 24 March 2026 – REHAU Window Solutions consolidates its digital solutions within a new, open and modular ecosystem: REHAU CONNECT+. It standardises data flows, shortens lead times and minimises manual effort. Digital services are an effective instrument for achieving the highest possible degree of future-readiness.

Platform & Ecosystem: REHAU CONNECT+ at Fensterbau Frontale 2026.

With REHAU CONNECT+, REHAU Window Solutions brings together all relevant digital services on a single platform for the first time: one login, modularly combinable, scalable and future-proof. All parties work with identical, up-to-date data. This significantly reduces media breaks and coordination effort.

- **Window manufacturers: Efficient coordination, clear workflows, stable processes and optimal utilisation of existing resources.**
- **Retailers: Faster quotation cycles, transparent project status, improved planning reliability.**
- **Architects & planners: Reliable, consistent data foundation for planning, tendering and documentation.**

“With REHAU CONNECT+ we are for the first time connecting all digital services along the value chain on a single platform – with just one login and maximum flexibility. Our customers can select precisely the modules that address their current challenges. The result is an open, practical and future-proof digital ecosystem that enables genuine end-to-end connectivity and sustainably relieves the burden on businesses,” says Peter Hertlein, Head of Business Unit Digital Solutions and Head of New Business Development at REHAU Window Solutions.

Lead & Sales: REHAU Lead Pro. Simply win over and convince customers.

REHAU Lead Pro captures enquiries digitally, structures them and channels them into the quotation and production process without any loss of information.

- **Window manufacturers: Shorter response times, fewer queries, clean handovers to manufacturing.**
- **Retailers: Centralised lead management, higher closing speed.**
- **Architects & planners: Reliable information available at an early stage for variant decisions.**

Project Business: Simply Manage Projects.

REHAU CONNECT+ provides a unified, reliable data foundation for the project business. The new version of the planning software introduces not only a more simple, more flexible and more modern user interface, but also the capability to generate project-specific BIM and 3D data, or to create these directly from REVIT. In addition, project data can be processed further directly via GAEB-XML. The AI-supported GAEB integration significantly accelerates the processing of tenders and reduces sources of error, particularly in complex bills of quantities.

- **Window manufacturers: Less manual rework, reduced risk of errors in quotations.**
- **Retailers: Faster, consistent calculations in the project business.**
- **Architects & planners: Greater planning reliability, reduced liability and coordination risks.-**

Production: Simply produce with Precision and Efficiency.

REHAU Fabricate provides window manufacturing software that enables precise, structured and low-error production. REHAU Window.ID assigns each window element a unique digital identity during the production process itself. The approach utilises original production data, avoids duplicate data maintenance and creates DPP-compliant records across the entire lifecycle. REHAU Window.ID already meets upcoming regulatory requirements. With Rack.ID, the market launch of a digital rack management system is also underway, creating transparency in a process that has often been manual and prone to errors in the past.

- **Window manufacturers: Fewer rack losses, improved traceability, more stable logistics processes.**
- **Retailers: Transparent status information for customer communications.**
- **Architects & Planners: Clear, comprehensible documentation for acceptance, operation and decommissioning.**

ERP Integration: Simply standardise Processes.

In collaboration with technology partner Idalabs, a new ERP solution is being developed that comprehensively digitalises craft businesses and significantly simplifies day-to-day operations. The cloud-based, modularly structured software ensures efficient, error-free processes from the office to the construction site. Through seamless integration with REHAU Window Solutions offerings, customers gain central access to product data and digital services. The result: maximum efficiency and tangible relief in everyday working life.

- **Window manufacturers: No isolated solutions, reduced administrative burden, more precise resource planning.**
- **Retailers: Consistent goods and article data.**
- **Architects & planners: Reliable scheduling and quantity foundations.**

Installation: Simply Install and Track.

Even after production, every window retains its digital identity through REHAU Window.ID. From installation through service and maintenance to subsequent modifications, all relevant data remain clearly assigned and permanently accessible. This ensures transparent documentation, facilitates service operations and establishes a sustainable foundation for the digital management and use of a window throughout its entire lifecycle.

- **Window manufacturers: Clear assignment of all elements and simplified service processes.**
- **Retailers: Transparent status information for reliable customer communications.**

- **Architects & planners: Comprehensible documentation for acceptance, operation and subsequent modifications.**

Full Focus on window professionals

The Digital Innovations of 2026 demonstrate how REHAU Window Solutions consistently combines innovation expertise with its claim as the leading All in One Partner. The digital services reduce time expenditure, minimise risks and create security – both today and in view of forthcoming regulatory requirements. At the same time, the platform logic remains open for further development beyond Fensterbau Frontale 2026. The innovations from REHAU Window Solutions at the Nuremberg world-leading trade fair focus on these growth modules:

- **Profile Solutions: High-Tech Materials for Top-Class Innovations.**
- **System Accessories with Added Value: Attractive Additional Options from a Single Source.**
- **Smart Products: Modern. Clever. Perfectly Integrated.**
- **Digitalisation Perfected. Simple. Efficient. Seamlessly Connected.**
- **Sustainability: Responsibility in action.**
- **Unique Innovative Strength: Pioneering Technologies and Developments for New Additional Business Models.**

REHAU Window Solutions 2026.

All in One Partner. Tailored to Your Success.

Create Difference. Grow Business.

The REHAU Industries Division Window Solutions reinvents windows and doors every day. For a better life. Its unique recycling approach EcoPuls represents an unrivalled sustainability concept within the industry. As a thought leader and driver of future-ready industry solutions, REHAU Window Solutions is the leading All in One Partner for holistic system solutions along the entire value chain: Windows. Reinvented for modern life.

The REHAU Group brings together companies from the construction, industrial engineering, materials, medical, mobility and furniture sectors under one roof. With polymer-based solutions, this globally operating family business generates annual revenues of approximately EUR 3 billion. A pioneering spirit and visionary drive inspire more than 13,000 employees worldwide to improve people's lives through the application of innovative technologies. Engineering progress. Enhancing lives.
